Corporate Overview

PROSS s.r.l. is a company focused on producing and supporting information systems.

Headquarters

Beyond the operational and administrative headquarters in Rome, PROSS s.r.l. takes advantage of a development laboratory located in the province of Chieti.

Solutions

Company's software solutions are based on open systems and technologies well-known on the market for their reliability and quality. The Company has the know-how and the skills required to realize distributed information systems both through client-server and web-based solutions.

Technologies

Analysis and development methods • Prerequisite management, analysis, design, codification and tests take place through an iterative process reflecting the methodologies defined as 'Agile Processes', in particular SCRUM and XP (Extreme Programming) using RUP (Rational Unified Process).

software development
